

# Nottingham Free School Case Study

The brand new Secondary Nottingham Free School had listened to their year 7 student's desire for lockers and chose Atlas Steel Lockers following a recommendation from Medan School.

32 Atlas lockers with blue and grey doors and key locks were installed in four classrooms. Management was simplified with the supply of management and master keys.

Sloping tops are added on to prevent the accumulation of litter and clutter, keeping the areas neat & tidy and the lockers clean & fresh.

**“Thank you for all your help and assistance with the lockers that were installed yesterday. They look amazing.”** - *Jacki, PA to Head of the School*
