

Oldswinford CE Primary School Case Study

This large primary school was having renovation work completed and wanted to use the time to install lockers into some of the classrooms.

48x 4 door Atlas lockers (450mm deep) were installed with white number plates & swivel catches; 8 banks of lockers in 6 different classrooms.

The school was surveyed, advised on product type and lock options before finally installing the lockers during the summer holidays whilst the building work was being completed.

The customer service was great, well explained & very detailed. The installation team was brilliant - no hassle. No other supplier went to these lengths.”
