

SUCCESS STORIES: HAILEY CE PRIMARY SCHOOL

BEFORE:

AFTER:

Hailey Church of England Primary School, established in 1847, is a small, community focused school situated in the idyllic Oxfordshire countryside. The work of a dedicated staff, and a vision to become the school of choice for local families, has resulted in growing pupil numbers over the past few years.

The school noticed that such successes were putting greater pressure on their existing cloakroom facilities, which were originally designed for fewer students, and therefore approached us for a locker storage solution.

Foremost among their concerns was the increasing disorder of the cloakroom. Cloak hooks and benches were making it difficult for pupils to locate their belongings, which could include two or three bags for PE kits, swimming kits, etc., and the resulting delays were becoming disruptive.

The school required lockers that could not only keep this area tidy and easily accessible but would also look great and improve the school environment. All of this had to be achieved as quickly as possible and in accordance with the budget.

There are often empty corners and offsets from wall skirtings with lockers installation; these empty spaces are prone to attract dust and rubbish gathering, personal belongings can also get stuck and lost between those gaps.

As part of our standard locker installation service, we offer timber & battoning to suit corners and offsets from the wall skirting to ensure the gaps are covered.

Our Atlas Steel School Lockers were the perfect fit - a simple and clean design, capable of keeping storage areas organised for an unbeatable price. Further still, the swivel catch option allowed students to store their belongings in closed yet unlocked compartments, ensuring that everything would be easily accessible.

The height of the school lockers was also a concern due simply to the height of the younger students. We delivered a custom solution by fitting the top row of lockers

with key locks, providing secure storage to teachers, and the lower lockers with swivel catches, allowing the students' doors to be fastened but lockable only with a padlock.

Despite all of this, our prices were the lowest of three quotations, and, thanks to the high locker stock levels maintained in our Milton Keynes warehouse, we were the only supplier who was able to **survey and design the layout with CAD drawing, quote, supply, deliver and install the lockers all within 2 weeks** - just in time for the school holidays.

“The design & survey service were excellent; the lockers were well explained and there were descriptive plans on where to locate the lockers on site”
