

## SUCCESS STORIES - WILBRAHAM PRIMARY SCHOOL

This large Manchester primary school was using cloakroom hooks for personal items and jackets, which caused health & safety concerns resulting in a failed fire inspection.

Action Storage installed 160 x 3 door **custom sized** Atlas lockers with swivel catches & sloping tops.

A member of our specialist sales team surveyed the school, determined the best locker placement & capacity, and managed to deliver the most cost effective project quotation; even custom building lockers to the exact size requirements of the school.

The custom height of 1372mm ensures that all children can easily access every compartment.

*The Atlas lockers were simply the best: style, look & feel, build quality, etc... Action Storage were 50% cheaper than other suppliers!*

### Business Manager's thoughts
