

The brand new Secondary Nottingham Free School has listened to their year 7 student's desire for lockers. After a vote conducted by the Student Council the school has managed to install the lockers requested by their students - even without any dedicated locker budget.

The decision to award the business to Action Storage was based on great communication and a recommendation by Medan School, part of the same Trust of Schools.

32 x 3 doors Atlas steel lockers with key locks were installed in four classrooms (24 compartments per classroom). Key management was simplified with the supply of management and master keys.

Each bank of lockers comprised of 2 colours, at no extra cost; blue and grey vertical stripes to match the school colour. A simple but favourable feature to the school.

Sloping tops are added on to prevent the accumulation of litter and clutter, keeping the areas neat & tidy and the lockers clean & fresh.

“Thank you for all your help and assistance with the lockers that were installed yesterday. They look amazing.”

Jacki, P.A. to Head of School

Locker Quality: ★★★★★

Overall Experience: ★★★★★
