

## SUCCESS STORIES: OLDSWINFORD CE PRIMARY SCHOOL

After a successful locker installation for their year 5-6's, Oldswinford Church of England Primary School returned to us to provide personal storage for their year 3-4's. We have found that staggering the purchase of lockers by year group in this way is a highly effective method of tidying up any school within budget.

A communal cloakroom area that relied on traditional coat hooks was causing general disorder in a busy thoroughfare. Not only did this have a negative impact on the appearance of the school but also increased the risk of injury by obstructing escape routes and making trips and slips more likely.

The school were particularly pleased with the 60, 3 door Atlas Steel Lockers (180 locker compartments) that we installed previously. Their favourite feature was the fantastic choice of vibrant colours that allowed the lockers to be styled in the school colours of red and blue. The sleek modern design also served to enhance the open plan reading area in which the lockers were located.

As well as looking great, Oldswinford School have found our lockers to be especially practical due to the unique quick change door system, which requires nothing more than a soft mallet.

Despite Atlas Steel Lockers offering some of the most comprehensive reinforcement available, in the everyday hustle and bustle of school life, steel locker doors can be easily damaged, and so it is useful to be able to replace doors quickly, mitigating the effects of accidental damage and discouraging copycat vandalism.

With so many advantages at an unbeatable price, Oldswinford School decided to order another 40, 3 door Atlas Steel Lockers (120 locker compartments) for the younger year groups. As with the previous installation, each locker compartment provides one child

with a place to store personal belongings in an orderly manner. Swivel catches act as a handle, ensuring the doors remain closed once shut but do not need to be locked, which is perfect for primary school students.

Overall, both management and pupils are delighted with the new set of lockers. We were told that, with the older year's lockers in the adjacent room, the younger pupils are tremendously pleased to finally have their very own storage space. The two areas are now much tidier, and complemented by a new paint job, the lockers work wonders to boost the general appearance of the school.

***"I was told that one of the students was so excited about the lockers, she couldn't sleep the night before!"***
